

Greetings,

On Wednesday, December 28, 2016, between the hours of 12:00 PM and 4:00 PM there will be one rolling road block on the Southbound lanes of Interstate 89 in between exits 19, 18 and 17 to enable machinery, a crawler crane, for a culvert replacement project to cross lanes. There may be up to a 10-minute delay at Exit 18 for vehicles entering the Southbound ramp at US Route 7.

The rolling road block had been previously scheduled for Friday, December 23rd but was delayed by weather conditions.

The Northbound lanes of I-89 will not be affected. Southbound motorists should allow extra travel time to allow for slower travel when the one rolling road block occurs.

The Vermont Agency of Transportation is replacing the culvert, located about 40 feet under I-89, 1.1 miles south of Exit 18 at milepost 105.37. The project will be constructed by the design-build team of J. A. McDonald, Inc. and Stantec.

For more information see the project website,
www.i89sbgculverts.vtransprojects.vermont.gov.
